### **Outline for Detail Drawings: Each Drawing is 5% of final grade**

#### **Note:**

1. There are five (5) drawings to be manually drafted and each worth 5% of your final grade. Therefore the five detail drawings are worth 25% of your final grade.
  2. Copies of the Detail Drawings are on Blackboard. Please note that the details cannot be traced as the sizes and proportions assigned are different from those on the sheets.
  3. Manually draw each detail drawing assigned at scale:  $1\text{'-}0'' = 1\text{'-}0''$  on 11" x 17" paper.
  4. Where rigid insulation is noted on each detail, draw the rigid insulation as a grid instead of the solid hatch symbol as shown on the assignment sheets.
  5. Detail drawings are to be submitted at the start of the class on the date that the detail drawing is due. Dates are listed on the course syllabus
